Thought You'd Like to Know:

The ultimate educational goal for your children is to graduate from high school and go on to college or successful employment. For that to happen, they must pass the CAHSEE. One of the things that prevents that is weak math skills. Knowing the math facts from memory will help. Kids who know how to do math often get answers wrong simply because they don't know their times tables. Please, let Brain Builders be your incentive to once and for all, get the job done. Your child needs your help.
