LCAP GOAL 1: Increase Proficiency and Strategic Thinking

Identified Needs Based On Data: Based on student achievement data, it is evident that there is a gap in teacher knowledge in creating and delivering rigorous lessons. In addition, it is evident that although students might be taught the skills needed, they need more instruction on how to expand and apply their learning to different contexts. Based on this data analysis, the following needs were identified:

1. Identify Essential Standards- Teachers need to identify essential standards in order to focus on the content that is essential for meeting standards as well as essential prior knowledge for the next grade level.
2. Learning Targets/Success Criteria- Teachers need to establish clarity in what they are teaching not only for students but for themselves. Students need to know what they are learning and should be able to identify if they have met the success criteria for the lesson.
3. Depth of Knowledge Training- Teachers need to understand how to develop lessons that require more critical thinking by students. Teachers need more training on how to ask higher level questions while teaching.
4. Strategic Thinking in Math- Students need to develop metacognitive strategies in tackling math word problems.
5. Students articulating their thinking- Students need to be able to articulate their reasoning in a coherent manner in Language Arts and Math.
6. Students need opportunities to participate in activities that are engaging and require strategic thinking and complex problem solving.
