Fontana Unified School District

ESTABLISHED 1956

Dear Neighbor,

It has been an exciting year at Fontana Unified School District (FUSD), and we are thrilled to be nearing the end of a successful first year with students back in-person at each of our elementary, middle and high school campuses. I am grateful for the support of our community, teachers and staff who have worked hard to help ensure our schools are safe learning environments for all students.

Changing Requirements for Success in the Modern World

Our focus on core academics, innovative classroom programs and career pathways helps ensure that each student has an equal opportunity for success and is skilled in the use of today’s technologies. However, more than half of our schools are over 30 years old and 16 of our schools are 50 years old or older, and do not meet today’s evolving education standards. Updates are needed if our schools are to keep up with the changing educational landscape.

As the District evaluates the state of our schools, we value your feedback and involvement. Your input is critical and will help shape the future of our schools. Please fill out the survey card in this brochure or visit tinyurl.com/FontanaSDSurvey to share your priorities.

We look forward to our continued partnership.

Sincerely,

Randal Bassett
Superintendent, Fontana Unified School District

Aging Facilities in Need of Repair

FUSD has been serving the community and providing high-quality education to local students for over 65 years, but many of our facilities are aging and in need of repair. Outdated security and safety features, including aging electrical and fire safety systems, as well as portable classrooms with only one or two electrical outlets and limited high-speed internet access are inadequate for today’s learning environment.

Potential Bond Measure to Protect Quality Education

To keep pace with academic standards and improve student safety and security, Fontana Unified School District is considering placing a bond measure on the November 2022 ballot. The measure could generate up to \$349 million for school facilities projects and cost property owners within the district approximately \$60 per \$100,000 of assessed (not market) value while bonds are outstanding.

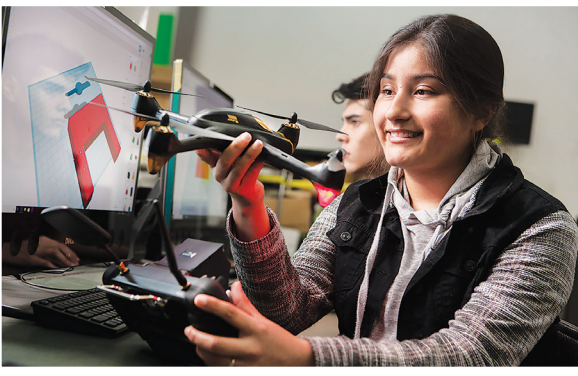

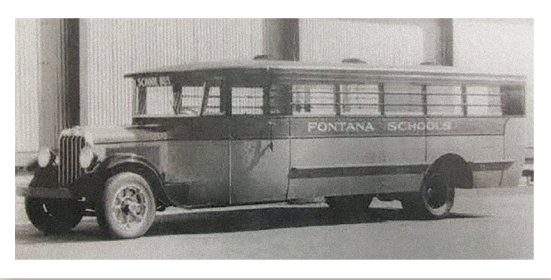

If approved, bond funds could be used to:

- Repair leaky roofs and remove asbestos, lead paint and mold
- Keep schools safe and secure
- Provide early childhood classrooms for all children under 4 years old at every school site by 2025
- Prevent overcrowding by providing additional schools and classrooms
- Help prepare our students for 21st-century jobs and careers
- Build science, technology, engineering and math labs

Strict Fiscal Accountability and Transparency

A potential locally controlled bond measure would include strict fiscal accountability protections, including:

- No money from a bond measure would go towards administrators’ salaries or pensions
- All money raised by a measure would stay local to support our students and could not be taken away by the State
- A Citizens’ Oversight Committee and independent audits would be required
