

Computer Science Equity 12.8.2021

The Computer Science Equity Mini-Summit is an event intended for stakeholders to participate and learn about ways to introduce or advance computer science education as it relates to equity, inquiry and computer science concepts.

One of the top priorities for our county is to address educational equity and access. With that said - join an incredible network of educators, administrators, counselors and community members to continue the impactful work that is happening in advancing computer science education as it relates to equity, inquiry and computer science concepts.

This event will include four spotlight speaker presentations and break out sessions.
